**next regular City Council Meeting**  
**November 12, 2013, 6:30pm**

**To: Honorable Mayor  
And Members of the City Council**

**Date: Nov 7, 2013**

**From: Steve Speights, PE – City Engineer**

**Subject: Monthly Activity Report**

---

**6<sup>th</sup> Street Bridge**

Construction on hold till spring.

**Wastewater Treatment Plant Phase 1 Design/ Funding**

In discussions with SRF staff they have requested we submit plans and specs for their review. They are looking to confirm that the work called for on the plans is consistent with our application and that the appropriate specification language is included.

At their request, we are also reviewing SRF funding statements to confirm their correctness. These include environmental, engineering and funding items.

**Wastewater Treatment Plant Phase 2 Funding**

The Phase 2 Draft EIR was distributed through the state clearing house to interested agencies. We have also given a copy of the draft EIR directly to our SRF project manager and the USDA project manager. As a source of funding, they have a greater influence on the document than just an interested party.

The appraisal revisions are scheduled to be completed by Friday Nov. 15<sup>th</sup>. The revisions also include an update to current market conditions because it has taken so long to get it revised.

We were recently notified that our USDA project manager has been transferred to the Salinas office and our project files have been moved to the Auburn office. We have a meeting scheduled for Tuesday the 12<sup>th</sup> to meet the new project manager and brief him on the project.
